

GRESB Infrastructure Fund Standard

2026 Updates Summary Table

This document summarizes the [GRESB Infrastructure Fund Standard - 2026 Updates](#). For detailed information on each change, please refer to the complete document. Should you have any questions, please [contact](#) the GRESB Member Success team.

Note that all indicators where new content has been introduced are not pre-filled in 2026.

STATIC FUND ASSESSMENT & RELATED UPDATES					
TOPIC	INDICATOR CODE	DESCRIPTION OF CHANGE	REPORTING IMPACT	VALIDATION IMPACT	SCORING IMPACT
STATIC FUND ASSESSMENT	ALL INDICATORS	Elimination of the need to annually update the fund assessment by pre-filling it completely.	Funds may seamlessly submit a pre-filled response, so long as they have not materially changed their management practices. Each update in this table helps enable the fund assessment to become static.	—	—
EVIDENCE REQUIREMENTS	RP1 RM1.1-1.2 RM3.1-3.6	Removal of the reporting-year-applicability requirement for evidence.	Participants may choose against uploading new evidence when policies and management practices remain materially consistent.	✓	—
INCIDENT REPORTING	RP2.2	Indicator removed.	Reduced reporting burden.	—	✓
STAKEHOLDER ENGAGEMENT	SE2	Removal of dynamic data points for the percentage of employees who receive training.	Participants are no longer required to report time-sensitive metrics.	—	✓
	SE3	Removal of dynamic data points for survey coverage and response rate.	Participants are no longer required to report time-sensitive metrics.	—	✓
	SE4	Removal of dynamic data points for gender ratio and age group distribution.	Participants are no longer required to report time-sensitive metrics.	—	—

GENERAL UPDATES					
TOPIC	INDICATOR CODE	DESCRIPTION OF CHANGE	REPORTING IMPACT	VALIDATION IMPACT	SCORING IMPACT
PORTFOLIO COVERAGE	RC6	Recognition of two new reasons to validly exclude assets from contributing to the Fund Score: • Non-infrastructure asset • Disclosure of data prohibited due to national security restrictions	Participants may select two new exclusion reasons. If selected, GRESB may request supporting evidence after submission.	✓	✓
SUSTAINABILITY REPORTING	RP1	Indicator simplified so that only one disclosure type is required. List of third-party standards expanded to include SFDR.	Participants are only required to identify elements of a single sustainability report.	✓	✓
CLIMATE RESILIENCE	RM2	Updated climate scenarios to reflect most recent NGFS data and discontinuation of the 2°C scenario from CRREM.	Participants may select the most recent climate scenarios.	—	—
